TECHNICAL SKILLS

- **Languages:** Java, C++, JavaScript (ES6+), SQL
- **Frontend:** React.js, HTML5, CSS3, Tailwind CSS, Bootstrap
- **Backend:** Node.js, Express.js, REST APIs, MongoDB, MySQL, JWT Authentication, Redis
- **Scalability & Performance:** Pagination, Database Indexing, Caching, Rate Limiting, Load Testing
- **Tools & Technologies:** Git, GitHub, Postman, Jira, Docker (Basics), BullMQ, k6
- **Core CS:** Data Structures & Algorithms, DBMS, Operating Systems, OOP, Computer Networks

PROJECTS

Focusyn – Productivity & Focus Management Platform | Link Apr' 2026

- Improved task and productivity feed response performance by ~50%, measured through reduced API response times, by implementing optimized MongoDB queries and scalable backend APIs.
- Reduced redundant database operations through modular backend architecture, Redis caching, and reusable service-layer implementation.
- Increased backend responsiveness and request-processing efficiency by ~35%, measured during concurrent API testing, by optimizing middleware execution and API workflows.
- Built scalable backend systems for task management, productivity tracking, authentication, and focus session workflows using modular REST API architecture.

  Tech Stack: React Native, Tailwind CSS, Node.js, Express.js, MongoDB, Socket.io

GharSeDeal – Online Marketplace | Link Jan' 2026

- Improved listing API latency by ~10x, measured using Postman benchmarks, by implementing server-side pagination and optimized MongoDB queries.
- Reduced database overhead and API payload size by ~60% through indexing, selective field projection, lean queries, and Redis caching.
- Increased backend scalability and request-handling efficiency by ~40%, measured using k6 load testing, by optimizing middleware flow and modular backend architecture.
- Independently designed and developed the complete backend system, including authentication, database schema design, middleware, and performance optimization.

  Tech Stack: Next.js, TypeScript, Tailwind CSS, Node.js, Express.js, MongoDB, Socket.io

BiteXpress - Food Delivery Platform | Link Nov' 2025

- Reduced database query execution time by ~35%, measured through SQL benchmarking and API testing, by optimizing relational schemas and CRUD operations.
- Improved frontend-backend communication efficiency by ~40% through structured REST APIs for cart, order, and user management workflows.
- Implemented JWT-based authentication and role-based authorization, securing user sessions and access control
- Strengthened backend security using bcryptjs hashing and integrated MongoDB for efficient, scalable data management

  Tech Stack: React Native, Tailwind CSS, Node.js, Express.js, MongoDB

ACHIEVEMENTS

- Solved **550+ Data Structures & Algorithms problems on LeetCode** — @shrawansah
- Earned **4 ★ badges** in **Java, C++**, and **SQL** on **HackerRank —** @shrawansah3067

CERTIFICATES

- Full Stack Web Development | Udemy | Certificate Sep' 2025
- DSA with Java | Apna College | Certificate Sep' 2024

EDUCATION

Lovely Professional University Jun' 2022 - Present
Bachelor of Technology - Computer Science and Engineering | CGPA: 7.30 Phagwara, Punjab
