Shrawan Kumar Sah

Full Stack Engineer | React.js · TypeScript · Node.js

shrawansah3067@gmail.com | +918360705978 | Phagwara, Punjab | Portfolio | LinkedIn | GitHub

SUMMARY

Full Stack Engineer with hands-on experience building and improving end-to-end web applications using React.js, TypeScript, Node.js, Express.js, and SQL/NoSQL databases. Experienced in REST API development, authentication, database design, and performance optimization, including a 10× improvement in marketplace listing API response latency. Strong foundation in data structures, algorithms, and software engineering principles.

EXPERIENCE

Founder & Software Engineer — GharSeDeal, Jalandhar — Sep' 2025 – Present

- Built and enhanced a marketplace application using React.js, TypeScript, and Tailwind CSS, developing responsive interfaces and reusable UI components.
- Developed backend APIs and application workflows using Node.js and Express.js, including authentication, middleware, database schemas, and modular API architecture.
- Integrated REST APIs to connect frontend workflows with backend services, handling marketplace data and application state.
- Improved marketplace listing API response latency by approximately 10× through server-side pagination and MongoDB query optimization.

EDUCATION

B.Tech – Computer Science and Engineering — Lovely Professional University · CGPA: 7.30 — Jun' 2022 – Jul' 2026

SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, Java, SQL
- **Backend:** Node.js, Express.js, REST API Development, JWT Authentication, Middleware, Request Validation
- **Databases:** PostgreSQL, MongoDB, MySQL, SQL Queries, Schema Design, Indexing, Query Optimization, Pagination
- **Frontend:** React.js, Redux Toolkit, HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Design
- **Testing & Tools:** Jest, Postman, Git, GitHub, Debugging
- **Core CS:** Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

PROJECTS

Caliwo-AI Powered Nutrition Tracking App — Live — Jul'2025

- Developed an AI-powered nutrition tracking application that helps users log meals, estimate calories and macronutrients, and track daily nutrition goals.
- Built mobile interfaces and reusable UI components for meal logging, nutrition dashboards, and progress tracking.
- Integrated backend APIs to support meal data, user profiles, and nutrition tracking workflows.
- Implemened AI-powered meal analysis and nutrition insights to simplify food logging and improve the user experience.

React, React Native, Expo, TypeScript, Tailwind CSS, Node.js, Express.js, PostgreSQL

AllCalculator.net - Calculator Platform — Live — Nov' 2025 – Jan' 2026

- Developed and maintained a calculator platform featuring 750+ calculators and articles across multiple categories, focusing on usability, responsive design, and accessibility.
- Built user-facing interfaces for interactive calculators, emphasizing reusable components, input validation, and accurate real-time results.
- Grew the platform to 3,000+ monthly visitors, demonstrating real-world product traction and user reach.

React.js, JavaScript, HTML5, CSS3, Tailwind CSS, Node.js, Express.js, PostgreSQL

CERTIFICATIONS

- **Full Stack Web Development** — Udemy (Sep'2025)
- **DSA with Java** — Apna College (Sep'2024)

ACHIEVEMENTS

- **Data Structures & Algorithms** — Solved 600+ Data Structures & Algorithms problems on LeetCode — @shrawansah
- **HackerRank Badges** — Earned 4 badges in Java, C++, and SQL on HackerRank—@shrawansah3067
